Germany

- Berufskolleg Ennepetal
- Michaelschule Papenburg
- Ehm-Welk Oberschule Angermünde

Poland

- Zespół Szkół Ogólnokształcących Nr. 3 in Gorzów Wielkopolski
- Zespół Szkół Ekonomicznych in Międzyrzecz

The Netherlands

- ROC van Twente College voor Educatie Zuid
- Stichting Openbaar voortgezet onderwijs De Waerdenborch

The realization of the cross-border practice contacts focusses on the neighbouring regions:

- Brandenburg (Germany) and Województwo Lubuskie (Poland)
- Lower Saxony (Germany) and Region Twente (The Netherlands)

Implementation of practice contacts
in schools and companies
for
teachers and students from Germany,
Poland and the Netherlands.

Project period:
01.10.2011 - 30.09.2014

supported by
the European Union
within the framework of
the Comenius program

GD Bildung und Kultur
Programm für lebenslanges Lernen

Why IIMPULS?

Background

Job mobility is becoming more and more important in the European Union. The differences in the educational systems in the EU member states, insufficient international networks and the lack of international competences of school teachers are hampering the development and preparation of students for a successful career on the European labor market.

Our ideas

Within IMPULS, teachers, students, school directors and representatives of business from Germany, Poland and the Netherlands work together in creating possibilities for future job orientation in Europe. Working on cross-border practice contacts as didactical learning method for this job orientation will be the focal point of this project.

Our working method

We develop, run and evaluate a training course for teachers, which will be the framework within which the preparation, realisation and reflection on cross-border practice contacts will take place. With support from Chambers of Commerce, schools and companies from the regions involved, a network should develop, which will be helpful in the further development of the future job mobility and job orientation of students in Europe.

Target groups

In the project will be developed

- An innovative concept for cross-border practice contacts
- A framework for the development of job orientation for students of schools of general secondary education
- Teaching and learning materials
- Cross-border networks between schools and representatives from business
- An internet based cooperation platform for practice contacts

Target groups

- Students of schools for general education and students of vocational schools
- Teachers
- Coordinators for job orientation education as well as student psychologists
- School directors
- Training centers
- Institutions within society
- Businesses of all sizes
